Garage Hazardous Waste Disposal

- On demand collections
- Managed scheduled collections

Our unique multi-compartment vehicles enable waste oil and small quantities of drummed waste to be collected in one visit. This minimises disruption to our customers operations and by reducing vehicle movements is kinder for the environment.

Enva offer sound technical advice enabling clients to manage their businesses while complying with the increasing burden of environmental legislation.

- Oil Filters
- Anti Freeze
- Brake Fluids
- Mixed Fuels
- Rags & Absorbents
- Empty Aerosols
- Contaminated Plastics
- Lead Acid Batteries
- Hydraulic Hoses
- Grease Cartridges
- Manage scheduled collections

Curtainside Collections

Our fleet of curtain-sided vehicles are used for collecting larger volumes of drummed / IBC / palletised waste on an on demand or scheduled basis.

Wipe-Smart Dispenser

Our unique metal range of dispensers offer a more convenient, more efficient and safer method of storing our wipers on your premises. The dispenser will be serviced on the agreed schedule by your service driver. Clean wipers will be stored in the upper access point, opening out to a removable storage unit for the soiled product.

environment matters

Bulk Collections

Closed-top and open-top 1000 litre IBC's can be provided for storage of larger quantities of hazardous waste.

Cage Collections

For larger producers of certain hazardous waste streams i.e. nominally empty plastic containers, we can provide cage units which have a greater storage capacity.

Tankered/Interceptor Services

All liquid emanating from vehicle wash bays, garage forecourts and other areas where oil or chemical products may be spilled has to run through an interceptor to ensure that no contaminants enter the surface water drainage system. In the absence of an interceptor liquid can be stored in a holding tank.

At Enva we can provide a regular service to your interceptors, removing the accumulated silt and oil. Furthermore we can empty holding tanks. We can provide a fully automated service, attending on pre-defined intervals.

Industrial Hazardous Waste Disposal

Our Industrial Division provides bespoke solutions to hazardous waste disposal problems either on a scheduled or on demand basis. Service capabilities include: waste handling and collection, listing and packing service, spillages and remedial work.

- Waste Paint Recovery
- IBC Waste Disposal
- Chemical Waste Disposal
- Drummed Waste Disposal
- Caustic / Acid Waste Disposal

IBC Liquid Collections

Closed-top 1000 litre IBC's can be provided for the storage of liquid wastes and collected using on our curtain-sided vehicles.

Palletised Waste Collections

Sealed containers can be securely shrink-wrapped on pallets and collected using one of our curtain-sided vehicles.

Drummed Collections

Larger quantities of 205 litre drums containing solid/liquid waste can be collected using one of our curtain-sided vehicles.

Waste Paint Collections

Full/part-full tins of paint can be stored in 1000 litre FIBC's and collected using one of our curtain-sided vehicles.

Sampling

Waste liquids not having a data sheet must have samples taken and subsequently tested either in our on-site UKAS accredited laboratory or by a third-part specialist prior to collection.

Testing

Testing of most hazardous wastes can be carried out in our UKAS accredited laboratory at our facility at Bilsthorpe. UKAS accredited laboratory number 4671.

Packing

Industrial Department staff have the technical expertise to offer packing and listing service.

General Waste Services

General & Recyclable Waste

We offer a general waste package, which has been developed to Revise, Reduce and Recycle general waste wherever possible. Our carefully chosen network of partners operate on a national basis to offer scheduled collections of Eurobins, front and rear loaders and roll on/roll off containers.

Eurobin

Designed for light compactable waste and recyclables are ideal for small businesses with limited space or access issues.

Front End Loader

Suitable for light compactable waste and recyclables and ideal for small businesses and businesses with limited space or access issues.

Internal Recycling

Internal Office Recycling Boxes are available for either card and paper only, or for dry mixed Recyclables i.e card/paper/clean empty plastic bottles/cans/crisp packets/clean empty food packets

Roro

Suitable for heavy, bulky and non-compactable waste.

Skips

Predominately used for site clearances and storage of scrap metal.

enva

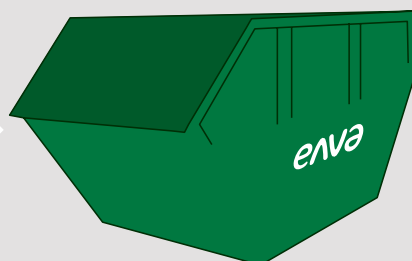

Scrap Metal Disposal

Enva offers a disposal service for your waste scrap metal, we can provide 8/10 cu.yd open top skips or 10/12 cu.yd closed top skips for the storage of metal, including brake discs and wheel hubs. For smaller quantities of scrap metal we can provide a pallet box.

Collections are made either on an on demand or scheduled frequency.

It is illegal for anyone to buy scrap metal using cash

Additional Services

Weee Waste Disposal

Spent fluorescent tubes and sodium lamps contain mercury and phosphor powder and as such deemed to be Hazardous Waste. Other types of electrical waste include computers, monitors, televisions and printers. Fluorescent tubes and lamps are crushed at our other electrical items are sent to specialist outlets for recycling/recovery.

Tyre Disposal

Tyres cannot be sent to landfill and we use a network of dedicated companies who collect and reprocess into several alternatives including 'chip and crumb' for use in rubberised playing field surfaces.

Confidential Waste Destruction

With security paramount, this sensitive operation involves the collection and shredding of paper documents under strictly controlled conditions. IT equipment such as computer hard drives is shredded under strictly controlled and a formal 'Certificate Of Destruction' issued if required by customers.

Site Clearance Service

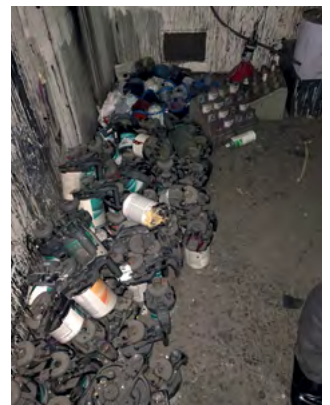

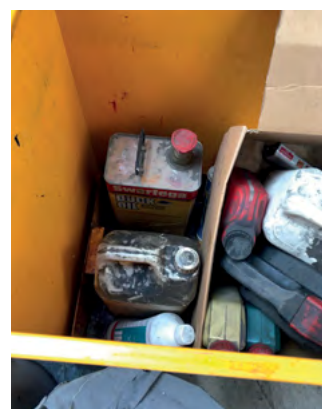

Enva offers a comprehensive site clearance service, which includes a team of experts on hand to manage the project from start to finish.

During the site clearance, we will utilise our team to decommission services including but not limited to;

- Interceptors
- Oil storage tanks
- COSHH stores
- Waste compounds

We will utilise our expertise in the waste management industry to ensure all site clearances are conducted in the most cost effective, compliant and safest way possible.

Spill Containment

Enva offer a wide range of storage solutions to help you store your hazardous waste in a safe and compliant manner.

Compliant

For more information on the guidelines for the storage waste oil please visit: enva.com/waste/hazardous-waste
These guidelines are written for site operators and we recommend that you follow them as good practice to help you be:

Safe

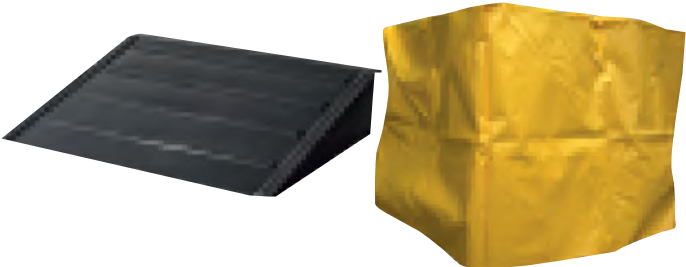

Our storage solutions provide safe storage and handling for your drums and IBC's, reducing manual handling risks and the risk of damage to drums and IBC's.

Environmental

Our storage solutions meet all the current regulatory requirements for oil storage, reducing the risk of pollution from your site to land, surface waters or groundwater as a result of the storage, maintenance and handling of drums and IBC's.

Why not ask our representative about our services and adaptability to provide your business with requirements that suit your needs.

Bodyshop Services

Spray Gun Cleaning Equipment

Enva offers solutions tailored to your business requirements. We provide services that include regular machine maintenance and detergent replacement. The Enva team can also provide training on operating equipment and waste handling/storage.

Compliance

We provide and complete all statutory records, keeping our customers compliant with current and changing legislation.

Performance

The unit recirculates solvent, thus reducing VOC levels and the amount of waste generated. The automated operation allows for optimal cleaning and use of solution. It also allows the user to multi task.

Service

Regular servicing is carried using our fleet of specialist vehicles. We will replace the solutions, remove the waste solutions and provide routine maintenance on the machine.

Our spray gun cleaning machines are the only units in Europe to be approved by two spray gun manufacturers.

- We reduce VOC's through our solvent saver system
- Improvement in health and safety of the users
- We have dual and single automatic/manual machines
- All units can be solvent or water based
- All units are ATEX approved
- All environmental paperwork is provided with waste removal and replenishment of solution with correct labelling
- Online portal providing access to hazardous waste reports and documentation
- Quarterly returns submitted / Hazardous waste analysis reports / VOC reports

Bodyshop Waste Disposal

As part of our Bodyshop services we can also assist you in the disposal of the waste you produce as part of your operation. This includes waste streams such as;

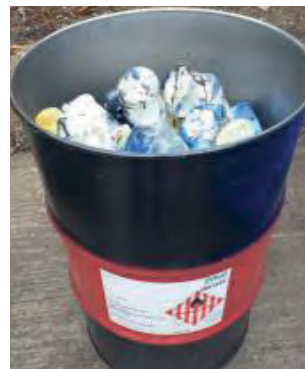

- Aerosols
- Empty Mixing Pots
- Empty Paint Tins
- Full/Part Full Paint Tins
- Paint Contaminated Rags and Wipes
- Liquid and Solid Paint Waste
- Spray Booth Filters
- Waste Thinners
- Empty Containers

We will ensure the correct containers and labels are provided to assist with segregation of your wastes.

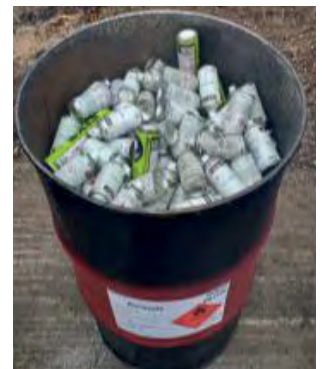

Compaction Equipment

Can Crusher

- Air operated
- 1900 lb/865 kg force
- Fully automatic
- Compaction up to 80%
- Double acting pneumatic cylinder
- Safety Interlock
- Bench or wall mounted
- Crushes 16 Litre paint or thinner cans

Mixing Pots

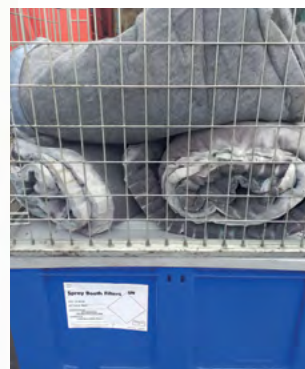

Aerosols

Paint Tins

Waste Paint

Spray Booth Filters

Waste Thinners

Our business

Enva is a leading provider of recycling and resource recovery solutions, with locations across the United Kingdom and Ireland. With sustainability at the forefront of our proposition, we recover a broad range of hazardous and non-hazardous waste materials for re-use in manufacturing and energy conversion. We also provide a complete portfolio of industrial, water and waste water services. At Enva we are committed to recycling and resource recovery; it forms the basis of our business strategy and our values.

We support the life cycle of waste products to provide either a second life, such as the production of energy or, in many cases, closed-loop recycling solutions. Our dedication to developing new and innovative products and solutions and extending the life cycle of the world's resources is driving our business forward.

Whilst to many Enva is a relatively new brand, our constituent operations have been around for many years and have significant heritage in the UK and Irish recycling and resource management markets. As a result, we are fortunate to have a highly skilled and experienced workforce who are close to their markets and customers. Operating under a single brand enables us to realise the associated operational and commercial synergies for customers across our key markets.
