Description

For use in toilets, urinals (flush and waterless), floors, drains, tiles, walls, it can remove scale grime and odours using bacterial enzymes that cling to the build-up and digest it making the washroom naturally clean and has a fresh mint fragrance. Effective on soap proteins and other organic materials, waste pipes etc.

Containing bio cultures producing enzymes, their natural biological action digests the build-up of uric acid in urinals. Biodegradable and environmentally safe.

Odour reducing and harmless to all types of pipes, tiles etc, the product continues to work for days after the initial use, is Ph neutral, and contains next generation sequester for hard water, stopping the buildup of lime scale in pipes which are the main cause of scaling.

Application

Apply 10-1 to flush urinals and toilets, apply at a dilution of 20-1 for waterless urinals.

For applying to tiles and floors etc. dilute product at 20-1 and spray on and wipe or mop off. Can also be dosed automatically through a controlled dosing dispenser to urinal header tank 100 ml per day.

Directions for use

For the biological cleaning and removal of odours in washroom areas.

Using pump dispenser, pump 7 times into 750 ml spray bottle and top up with water. Apply to all surfaces including floors, walls, urinals, toilets and basins.

- Product to be used neat on urinals and toilets.
- Bio Washroom is effective at biologically breaking down human waste, body fats and soaps.
- By applying the product directly into drains and P-traps it will remove the build-up of sediment and ensure free running drains.
