## Safety, Health, Environmental & Quality Statement of Intent

### Enva England Specialist Waste

Enva's Management Systems scope, accredited to ISO9001, ISO14001 and ISO45001, relates to the provision of waste management services and laboratory services. Collection, treatment and transfer of waste oils, other permitted waste streams and the manufacture and sale of fuel products.

Enva recognises that Health, Safety, Quality, and Environmental issues relevant to our office, processing areas and logistics operations, are a fundamental part of our business. Our objective is to meet and where possible, exceed the requirements of all applicable legislation and Group policy. This will be achieved whilst addressing the needs of the business and maintaining our accredited Management Systems. Wherever possible, Enva shall commit to the implementation of identified best practice through its Management Systems.

In particular we shall:

- Continue to develop a positive Safety, Health, Environmental & Quality culture across the organisation involving employees in the development and implementation process.
- Ensure all employees and contractors take responsibility for working in a manner that promotes quality, minimises the risk of harm to the environment and promotes the Health & Safety of employees, contractors, visitors and members of the public.
- Assess the level of risk from all significant health, security, safety and environmental hazards and so far as reasonably practicable, ensure that they are eliminated or adequately controlled.
- Provide appropriate leadership, information, systems of communication, instruction, development training, retraining and supervision in health and safety to maintain and continuously improve the competence levels of all employees.
- Monitor and minimise the health, safety and environmental impact of our operations where reasonably practicable.
- Communicate, consult and encourage participation of employees and interested parties.
- Ensure full compliance with applicable legal requirements, Approved Codes of Practice and industry specific guidance and Protocols related to our Safety, Health, Environmental & Quality processes and corporate business strategies; these will be regarded as minimum standards of achievement.
- Allocate sufficient financial and physical resources to achieve our objectives.
- Accurately assess customer requirements, ensure that the quality of service delivered consistently meets or exceeds expectations and respond effectively to any concerns about the level of service provided.
- Regularly monitor, audit and review our own, contractors' and suppliers' performance to ensure continual improvement.
- Regularly review Company assets and security measures to minimise losses
- Maintain and communicate a COVID19 response plan and policy
- Provide an independent OH advisory service targeting health screening and health surveillance for each employee where appropriate

The Director and Management Team are responsible for Safety, Health, Environmental & Quality at Enva. They are supported in this role by the Safety, Health, Environment, and Quality Manager who, as a management representative, is responsible for developing the Company's policies and procedures in line with current Health, Safety and Environmental legislation and for monitoring/auditing compliance with the systems.

This Policy Statement is reviewed at least annually, and is communicated to employees, contractors and suppliers; prominently displayed for visitors and will be made available to the public, stakeholders and any other interested party on request.

# Notice of variation and consolidation with introductory note

**The Environmental Permitting (England & Wales) Regulations 2016**

---

Enva England Specialist Waste Limited

Bilsthorpe Oil Treatment Plant  
Brailwood Road  
Bilsthorpe  
Newark  
Nottinghamshire  
NG22 8UA

**Variation application number**

EPR/DP3331MG/V007

**Permit number**

EPR/DP3331MG

# Bilthorpe Oil Treatment Plant

## Permit number EPR/DP3331MG

### Introductory note

#### **This introductory note does not form a part of the notice**

Under the Environmental Permitting (England & Wales) Regulations 2016 (schedule 5, part 1, paragraph 19) a variation may comprise a consolidated permit reflecting the variations and a notice specifying the variations included in that consolidated permit.

Schedule 1 of the notice specifies the conditions that have been varied and schedule 2 comprises a consolidated permit which reflects the variations being made.

This variation is to include the shredding of waste oil filters and oily rags for recovery as an additional Schedule 1 Section 5.3 Part A(1)(a)(ii) activity, extend the permit boundary, and add additional waste types to table S2.2 (waste oils treatment). The annual limits listed in tables S2.2 and S2.3 remain the same. A new table S2.4 has been included for the waste types to be treated under the new Schedule 1 Section 5.3 Part A(1)(a)(ii) activity, with a throughput limited to 13,000 tonnes per year.

As a result of this variation there will be the addition of a new building within the extended permit boundary area to house the shredding activity, including a new emission point to air from the activated carbon filter serving the new shredder.

The rest of the facility is described as follows:

The facility is currently permitted to manufacture Processed Fuel Oil (PFO). PFO is used as a virgin fuel substitute in a variety of large industrial burning applications and undertake waste operations on a variety of hazardous and non-hazardous waste.

The facility is divided into 4 areas – two processing areas and two office facilities. The centre of the site is at National Grid Reference SK65256060.

The site is enclosed within a two metre high chain link fence topped with 3 strand barbed wire except for the eastern boundary which has a two metre high palisade fence along the access road approach to the site. Access to site is by one of two lockable gates with the northern access limited further by a remotely controlled barrier.

There are vehicle dismantlers and landfill operations to the east of the site and secure vehicle storage facilities to the north.

There is a dense area of shrubs and young trees to the western boundary which screens the plant from domestic properties some 180 metres away to the west.

Birklands and Bilhaugh SAC are 7 km from site. The River Greet is approximately 1 km away and Rainworth Water is 1.1 km from the site.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
