enva.com

Offering customers an enhanced portfolio of products and services

Your partner of choice

Enva is a full-service and leading provider of recycling and resource recovery solutions, employing over 1100 people at locations across the United Kingdom and Ireland.

With sustainability at the forefront of its proposition, Enva recovers a broad range of hazardous and non-hazardous waste materials for re-use in manufacturing and for energy conversion, as well as providing a complete portfolio of water and waste water services.

Our planet's resources are precious and scarce. The way we live and the expectations of a consumption driven society are magnifying the problem. Recycling, reusing and recovering the waste that we generate can go a long way to addressing these issues. At Enva we are committed to Recycling and Resource Recovery; it forms the basis of our business strategy and our values. We support the life cycle of waste products to provide either a second life, such as the production of energy or, in many cases, closed-loop recycling solutions. Our dedication to developing new and innovative products and solutions and extending the life cycle of the world's resources is driving our business forward, saving energy and saving resources.

Waste Management is no longer an accurate description of forward-looking organisations in this industry. Our mantra of Recycling & Resource Recovery, backed by an obsession to innovate, is driving our ever-growing range of products and solutions. Better processes and new techniques are allowing us to sustainably manage waste materials from a host of consumer, commercial and industrial sources. We don't simply collect waste, we transform it. Our environment really does matter.

Offering a wide range of sustainable products and solutions across all business and industrial sectors. From commercial collection of both hazardous and non-hazardous materials, to total waste management solutions, recycling, the recovery of resources and industrial services.

Recycling & Resource Recovery

Recycling & Resource Recovery, as an alternative to traditional waste disposal, makes the most of precious resources by converting waste into new materials, products and energy sources.

From paper and glass to aggregates for road building, Enva has tailored solutions for both recovery and reuse. Our aim is to contribute significantly to a reduction in the use of raw materials for energy generation, air pollution from incineration and water pollution. Our sustainable solutions support a circular economy and a more environmentally conscious society.

We are able to tailor our services to meet the needs of our customers. From commercial waste & refuse collection services, to total waste management solutions.

Industrial Services

Enva offers a range of specialist services to industry, from the treatment and recovery of hazardous and non-hazardous contaminated soils, to industrial cleaning services for waste water, power generation and chemical projects. Our dedicated and highly trained personnel, along with a fleet of highly specialised vehicles, work across all sectors.

These include industrial & manufacturing, utilities, pharma & biomedical, and transport & shipping. Tailoring our services to meet the individual needs of customers, we provide a clear strategy and extensive risk assessment of every project to ensure a safe, timely and on budget completion.

#WeAreEnva

The businesses and brands below have come together as Enva to offer customers an enhanced portfolio of services, products and solutions, with sustainability at the forefront of our proposition.
