- ✓ Virgin and recycled aggregates in stock

**High-quality
Aggregates,
sand and soils**

**BULK DISCOUNTS
AVAILABLE**

6F2 & 6F5

Made up of crushed hardcore materials including crushed brick and concrete. Sized from 125mm down to dust.

Ideal for: Bulk fill & haul roads.

Recycled Type 1

Recycled from reprocessed concrete, stone & asphalt. Sized from 40mm down to dust to create an easily compacted crushed concrete aggregate with similar performance to a Primary Type 1.

Ideal for: Hard-standings, haul roads, building sub-bases, as well as path, road, highway, driveway, and patio sub-bases.

Primary Type 1

Virgin crushed stone from quarries. Sized from 40mm down to dust to create an easily compacted crushed aggregate.

Ideal for: Hard-standings, haul roads, building sub-bases, as well as path, road, highway, driveway, and patio sub-bases.

10/20mm Gravel

10/20mm gravel with no fine material often used for pipe bedding and drainage.

Ideal for: Pipe bedding and drainage.

Fill Sand

Small loose grains of disintegrated or worn rock and normally used as a fill material.

Ideal for: Under pavers, concrete slabs and as a pipe bedding sand for back filled trenches.

Screened Soil

A reclaimed, screened, general-purpose recycled soil. Screening refers to the process of sieving the soil to ensure the product is free from foreign objects.

Ideal for: Turfing, landscaping, open spaces, golf courses, etc.
