Hazardous Waste

enva

Due to Government legislations and the operating permits we have for processing waste, there are some items we cannot accept in our skips. We are unable to take hazardous or toxic waste, unless prior arrangements have been made for a specific separate collection.

Please check the list below to see if you have any waste which falls into the unacceptable category.

Asbestos

In any form or quantity, this includes non-hazardous asbestos looking materials

Aerosols

Aerosols displaying any hazardous signs

Contaminated Soil

Includes soil contaminated with oil/diesel/petrol/asbestos

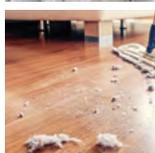

Chemicals & Pesticides

Displaying any of the hazardous signs either full or containing residue

Clinical Waste

Nappies, needles, soiled bandages and dressings

Dust

Fine dust particles which are not bagged or have not been dampened

Hazardous or Toxic

All waste labelled as hazardous including resin tins, industrial detergents, paints with residue, oil waste containers or bags.

Oil Filters & Waste Oils Diesel

Any materials contaminated with oil/diesel/petrol

Sludges and Liquids

We are unable to take any liquid waste

Syringes and Sharps

Either loose or boxed needles, syringes and sharps

To comply with the duty of care legislation it is the customer's responsibility to provide Enva with an accurate and suitable description of their waste to allow us to dispose of it compliantly.

Enva can collect all types of hazardous waste, however prior notification must be provided, and a separate collection will be required.

Any non-conforming items placed in skips will be returned to site or disposed of and charged accordingly. If you have a regular need for hazardous waste removal please call us to discuss your needs. We offer a comprehensive hazardous waste disposal service using our network of service providers.

If you are unsure whether something is classed as hazardous, please call and ask.
